

Show your Cleveland State spirit with a viking-themed pumpkin!

1. Cut a circle/oval around the top stem of your pumpkin large enough to clean out the pumpkin with a tool, and clean out its guts
2. Cut slits about 1-2 inches long along the edges of the stencil at intervals of about 2 inches. This will help the stencil curve around the pumpkin.
3. Tape the stencil onto the surface, from multiple sides to ensure it won't move.
4. Transfer the stencil onto the pumpkin by 1) using a pointed tool or pushpin to poke holes along the stencil design, or 2) trace and cut the stencil to score the design lightly onto the pumpkin.
5. Remove the stencil from the pumpkin, and rub some flour, cornstarch, or baking soda around the area so the dots or lines are more visible.
6. Carefully carve the pumpkin. Always make sure to not carve towards your fingers, or body!
7. Place a light inside the pumpkin and display your Viking Pride!
