President's Medal

The most prestigious non-academic recognition that Cleveland State University can confer, the President's Medal, is awarded to individuals, groups or entities whose commitment and dedication to the University are beyond question. The medal is conferred only when the honoree has made continuing and/or extraordinary contributions, or has provided exemplary and ongoing services that have directly and tangibly advanced the best interests and mission of Cleveland State University. The first President's Medal was presented in November 2004.

STU STATE UNIT		Recipients
STATE STATE	2010	Ronald E. Weinberg
	2009	Mrs. Jean L. Elsner
VER ON TIEN	2008	Natalie Epstein Lainie Hadden
	2007	Art J. Falco
2023 1964 1. ALEON	2006	Dr. William Hiller James D. Ireland III Stanley Miller
President's Medal	2005	Dr. Julian M. Earls Babs Glickman Maria Miller

Distinguished Alumni Award

Annually, outstanding graduates of Cleveland State University are honored for their service, leadership and career achievements with a Distinguished Alumni Award.

Note: The Annual Alumni Award dinner has been changed to October 2011. Following is a list of Alumni Award Honorees from the previous four years.

2007 Honorees		2009 Honorees	
Charles R. Emrick Jr.	George B. Davis Award	Christopher S. Ronayne	Maxine Goodman Levin College
Stephen F. Kirk	Monte Ahuja College of Business Administration		of Urban Affairs
Anthony J. Coyne	Maxine Goodman Levin College of Urban	Andrius Kazlauskas	College of Sciences and Health Professions
	Affairs	Carol G. Emerling	Cleveland-Marshall College of Law
Christopher W. Vasil	Cleveland-Marshall College of Law	Gary S. Adams	George B. Davis Award

Table 2.1: Cleveland State University Enrollment by Level - Fall 1965 - 2010

Highlights

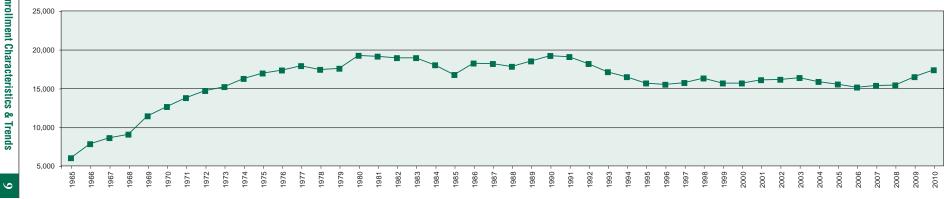

Overall enrollment has increased for the 4th straight year and is now at an 18-year high.

Note: CSU switched from quarter to semester terms in 1998.

Note: Prior to 2000 enrollment figures represented opening census. Since 2000 enrollment figures represent closing census.

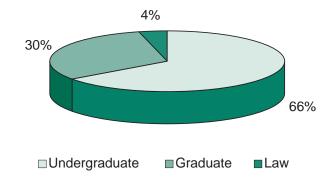

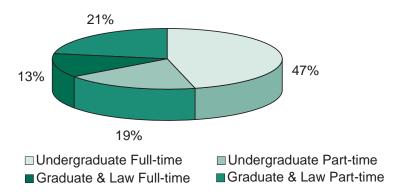

Figure 2.2b: Enrollment by Load and Level Fall 2010

¹ Other includes students enrolled in Air Force, Career Services, English as a Second Language, Military Science, Special Programs and Study Abroad.

Highlights

• Over 70% of undergraduates attend full-time. At the graduate level 66% of CSU students attend part-time.

CLASS has the largest number of undergraduates and COEHS has the largest number of graduate students.

Figure 2.4a: Total Enrollment by Ethnicity - Fall 2010

Note: Undergraduate full-time status: minimum of 12 hours Graduate full-time status: minimum of 9 hours Law full-time status: minimum of 13 hours

Highlights

One of CSU's strengths is that the student population reflects the diversity of our region and the University continues to attract a high number of foreign (Non-Resident Alien) students.

Note: A new methodology has been used to determine New Master & Doctoral students beginning Fall 2010. These are now cohorts chosen by Graduate Studies.

Beginning in Fall 2010 Graduate Licensure was moved from Masters/ Law to Other Graduate

¹ Other Graduate includes students enrolled in Non-Degree Courses and Transfers. Part-time new Masters and Doctoral students are also under Other Graduate now.

Highlights

Fall enrollment of new freshmen and new transfer students continues to grow.

The College of Sciences and Health Professions leads new undergraduate enrollment in the 5-year percentage change followed by Engineering.

Study Abroad: Prior to Fall 2010 SAB courses were counted under Developmental, for Fall 2010 they are included under Upper (84 units in Fall 2010).

Note: The lower number of units taken for Developmental courses reflects not only the shift of SABs mentioned above, but a re-categorization of some English classes from Developmental to Lower.

¹ Other includes students enrolled in Air Force, Career Services, English as a Second Language, Military Science, Special Programs and Study Abroad. **Note:** Some SCH gain in CLASS and Science is attributed to the redistribution of developmental English & Math courses to these units from Undergraduate Studies. Undergraduate Non-Degree and Graduate Studies fluctuations are due to procedural changes.

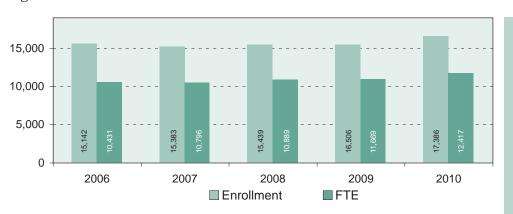

Figure 2.12 & 2.13: Fall Enrollment and FTE (SCH/15) Trend: Fall 2006-2010

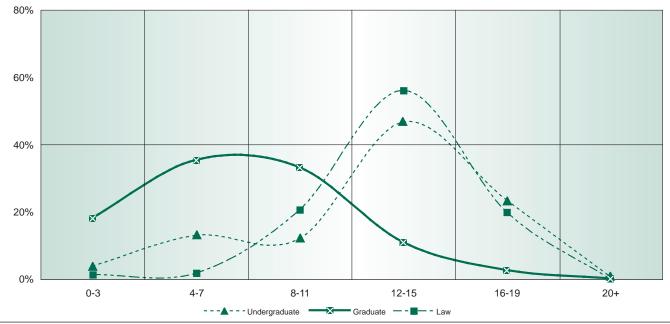

Highlights

- Student credit hours have grown substantially in the College of Urban Affairs since 2006 and has shown a 5-year increase of 49% followed by COSHP with a 5-year increase of 40%.
- BUS, CLASS, NUR, COSHP and EGR have all seen double digit percent change in enrollment over the past 5 year period.

College of Business

BACHELOR'S DEGREES

- **Enrollment Growth.** Enrollment has grown steadily since 2006 with the College showing a robust 28% increase in undergraduate programs over a 5-year period. This growth is attributable to improved recruiting, advising, and retention programs at the College level, smooth transitions for transfer students from community colleges, and the introduction of new majors and curriculum improvements to encourage degree completion.
- Assisting and Advising Freshmen and Sophomores. In order to better serve the interests and concerns of first and second-year undergraduate students, a new initiative is being studied that will help students to navigate through the academic, campus, and professional worlds of the undergraduate experience at CSU.

Monte Ahuja Partnerships with Area

Community Colleges. Enrollment in the BBA degree completion program at Lakeland has proved to be a very popular option for students wishing to go beyond the associate's degree and work on the baccalaureate degree. Enrollment has grown from 21 in 2008 to 49 in 2009 (an increase of 133%).

- Monte Ahuja Summer Scholarship: The College for the first time provided more than 65 scholarships to support undergraduate Monte Ahuja students' academic studies during the summer semester in order to help students fast track their degree completion.
- General Major in Business Administration. This recently-launched cross-functional major continues to show significant growth from 123 majors in 2007 to more than 400 in 2010. This major, which requires the student to take elective courses in a minimum of four functional areas, appeals to many working adults who want to complete the business degree at the main campus and at convenient extended campus locations.
- Other Popular Majors. Other majors that continue to show enrollment growth include accounting, marketing, information systems, finance, international business, operations management, and business economics. Students are also continuing to choose double majors.
- Viking Student-Managed Investment Fund: Monetary support from the Key Foundation, the CSU Foundation, and the Monte Ahuja College created a \$300,000 fund dedicated to providing business students with hands-on experience in formulating strategy and selecting and managing an investment portfolio. A hand-picked group of highly-motivated undergraduate and graduate finance students are enrolled in this program and make investment decisions as a team. Even in a volatile market, the fund has grown to more than \$400,000 in addition to providing students with valuable learning experiences.

SECTION 3

College of Business

continued from previous page

MASTER'S DEGREES

- With more than 800 full- and part-time students, the **MBA degree** continues to be the most popular graduate business degree in the College, accounting for more than 65% of graduate business enrollment.
- Enrollment for master's degree programs in business and CIS grew 20% over a five-year period. This increase has been attributed to improvements in the College's recruiting and enrollment management strategies and continuous improvements in programs aimed at student retention.
- The Global Accelerated MBA program, launched in 2010, focuses on upper-division MBA courses with a global flavor and includes an international business study tour. Recent Global AMBA classes visited Spain and Portugal (2010) and Belgium and the Netherlands (2011).
- The Master of Accountancy program has more than doubled in size from 2006 to 2010. The program continues to be popular because of attractive job prospects for accountants, strong faculty engagement with the accounting profession, curriculum improvements, and new admission requirements.

The Management & Labor Relations program is a small but selective program which has grown 17% over a 5-year period and 38% since 2009. The program prepares students for careers in human resources management and labor relations.

- Enrollment for the Master of Computer and Information Science program rose 11%. An economic turnaround—with improved hiring and internship opportunities—is expected to drive enrollment for the MCIS program.
- Overall enrollment in master's degree programs grew 20% from 2006-2010. Well-planned recruiting efforts and the offering of graduate programs at off-site locations including corporate sites have contributed to the growth of enrollments in our business programs.
- Certificate in Global Sustainable Business Practices. The Monte Ahuja College was awarded a grant from the U.S. Department of Education to integrate the principles of sustainability across all international business programs, partnerships, and alliances. The Global Certificate program was developed partly to fulfill the requirements of the grant but also to introduce sustainable business skills and practices to a new generation of business students. The program was launched in Fall 2010.

DOCTORAL DEGREES

- The DBA program prepares students to teach and conduct scholarly research in five areas: finance, marketing, information systems, operations and supply chain management, and global business.
- New cohorts are recruited every three years in order to provide full support for full-time students.
- Graduates of the DBA program are employed in faculty positions of universities in the U.S. and in various parts of the world including Canada, Taiwan, Zambia, Bangladesh, and Dubai.
- DBA alumni have achieved significant successes in academics and in industry.

Note: Corrected 4 incorrectly catagorized GCADE students formerly under English by moving them to Undecided CLASS (1 in 2006, 1 in 2008 and 1 in 2009).

Note: Other CLASS (FC) represents former First College students with non-specific majors, such as Personally Designed Major, who have not declared a new major.

College of Liberal Arts and Social Sciences

COLLEGE OF LIBERAL ARTS AND SOCIAL SCIENCES PROGRAM TRENDS

- CLASS continued to experience steady growth in almost all degree-seeking programs during 2010. The college grew by 7% overall (1-year change), increasing by 8% at the undergraduate level and 1% at the graduate level.
- The new graduate degree program in Global Interactions (Political Science), introduced in 2009, experienced 1-year growth of 475%, from 4 students in 2009 to 23 in 2010.

GROWTH AREAS

- Criminology, first offered in 2006, experienced a 1-year increase of 42%, making it the largest program in the College with 313 majors.
- Several other relatively new majors in the College continued to attract new students. These included the specialized degree programs in Communication: Communication Management (8% 1-year growth), Film and Digital Media (16%), and Journalism (14%). All three were offered for the first time in 2006.

UNDERGRADUATE TRENDS

- Undergraduates with declared majors in CLASS programs increased from 2,349 in 2009 to 2,640 in 2010, an increase of 291 new majors. This represents a 39% 5-year increase from 1,895 declared majors in 2006.
- More focused and consistent advising for undergraduate students continued to reduce the total number of students with no declared major. In 2006, there were a total of 775 students not admitted into a degree-seeking program; by 2010, this number had decreased to 430.
- Established majors that continued to exhibit steady growth over the 5-year period included Anthropology, Art, English, and Political Science.

GRADUATE PROGRAMS

- The College gained in graduate enrollments in 2010, increasing by 1% from the previous year and 8% over 5 years.
- The MFA in Creative Writing, housed in the English department, continued to show sustained growth, with a 35% 1-year increase and 64% over 5 years.
- The Master of Social Work program remained the largest graduate program in the College, with 192 students (37% of the 524 degree-seeking graduate students).

Note: COEHS has chosen to revise the way it rolls up individual plans to more effectively reflect its current programs.

Public Health transitioned from the College of Business to the College of Education during the 2007 reporting period.

College of Education & Human Services

BACHELOR'S DEGREE PROGRAMS

- In spite of the economic downturn and state budget cuts resulting in a weak local job market for teachers, undergraduate enrollment in all licensure areas shows strong growth in the short term.
- The Exercise/Fitness Specialist program continues to show increasing enrollment showing steady demand for specialists in this area.

MASTER'S DEGREE PROGRAMS

- There has been significant interest in off-site cohort programs in Adult Learning and Development leading to a recent boost in enrollment.
- The new program in Early Childhood Mental Health has enjoyed a rapid 2-year increase in enrollment.
- The Master's in Exercise Science has maintained its 2009 100% jump in enrollment for the second year in a row.
- Recently failed school levies and teacher layoffs may contribute to recent declines in the Administration, Organizational Leadership, and Curriculum and Instruction programs, which are largely populated by local teachers.

DOCTORAL PROGRAM

- Demand for the doctoral program remains consistent overall. Growth is limited by a cap on enrollment in this cohort-based program.
- With steady enrollment since its inception, the Counseling Psychology specialization continues to build to its capacity as the program matures. With its Fall 2010 accreditation by the American Psychological Association, this specialization is expected to grow even more. Strong academic students entering this track, combined with the program's enrollment cap, have resulted in fewer students in the Leadership and Lifelong Learning, Learning and Development, and School Administration tracks.

School of Nursing

The School of Nursing, which had been part of the College of Education and Human Services, became a free-standing unit reporting directly to the Provost effective July 1, 2010. The nursing enrollment data shown in this publication have been extracted from what was reported as part of the College of Education and Human Services in previous years.

The School of Nursing is housed in the Julka Hall, which provides a wonderful environment for students, faculty and staff to work together to meet student learning outcomes. The Nursing Resource Laboratories, an essential component for clinical education, remain in the Chester Building. They have been expanded and updated and continue to provide outstanding learning opportunities for nursing students.

BACHELOR'S DEGREE PROGRAMS

- The School of Nursing offers three different tracks through which students can earn a Bachelor of Science in Nursing degree. These are the traditional BSN track, the Accelerated Option track, and the RN to BSN track. The first two tracks allow the graduate to seek licensure as a professional nurse. The third provides a route for licensed RNs to seek the baccalaureate degree in preparation for graduate study and/or career advancement.
- The protracted slowdown of the economy and its consequences have temporarily diminished the critical nursing shortage, as nurses are delaying retirement and part-time nurses are choosing to work full-time. However,

the demand for nurses nationwide will continue to grow, making nursing an appealing career choice with excellent prospects for employment or promotion. The Accelerated Option (AO) track, which allows individuals with a bachelor's degree in another area to earn the BSN in four consecutive semesters, has been especially attractive to those seeking a change to a more stable career.

- Larger state-of-the-art classroom space in Julka Hall has allowed the School of Nursing to expand the number of qualified applicants accepted.
- Currently we admit 80 students to the basic BSN program which begins each year in the Fall semester, and 80 students to the Accelerated Option program which begins a new cohort each Spring semester. This change to the admission schedule has resulted in a temporary one semester decrease in AO enrollment, but provides a better sequence for students in this intense program.
- Beginning in Fall 2008, the entire RN to BSN track has been offered online, allowing working nurses the flexibility to complete a degree around their demanding 24/7 schedules.
- A major revision of the undergraduate curriculum and course scheduling based on student feedback and revised accreditation standards was completed in 2009. The new curriculum was implemented during this past year and promises to improve learning experience and enhance outcomes.

MASTER'S DEGREE PROGRAMS

The MSN program has seen enrollment increase as a result of the resumption of recruiting efforts that had been previously nearly absent due to loss of staff. Graduate students can choose from five tracks: Specialized Populations, Forensic Nursing, Clinical Nurse Leader, Nursing Education, and a joint MSN/MBA offered in cooperation with the Monte Ahuja College of Business.

The on-line delivery of this program serves not only working nurses, but also allows out-of state students to benefit from CSU's population health based graduate program. This has contributed to the observed increase in the MSN program, as have changes in professional standards that promote advanced education for nurses.

NEW PHD TRACK

To respond to the critical shortage of nursing faculty throughout the country, the School of Nursing will be offering a specialization track as part of the PhD in Urban Education degree in the College of Education and Human Services. Courses in this track, Nursing Education, will build on the core courses in the PhD program, and be taught by School of Nursing faculty. Applicants must have an earned MSN to apply and will be expected to focus their research on an aspect of nursing education. The first students will be admitted in the fall of 2012.

Table 3.5: College of Engineering: Fall Enrollment by Level and Major, 5-Year Trend

College of Engineering

BACHELOR'S

- Compared with 2009 data, the College shows a 9% increase. The increase in undergraduate enrollment can be attributed to Fenn Academy's involvement with local high schools.
- The increasing enrollment trend is expected to continue as the enrollment has increased by 50% over a five-year period.
- The College's new undergraduate enrollment shows a significant 73% increase over a five-year period (referring to Table 2.5). In particular, the new freshmen enrollment has realized an impressive 61% increase over the past five-year period. Furthermore, the new freshmen's high school mean GPA reached 3.55 in 2009.
- The enrollment decrease from the Industrial & Manufacturing Engineering was expected since its undergraduate program has been suspended since Fall 2009.

MASTER'S AND DOCTORAL PROGRAMS

- The College's enrollment at the Master's level slowed down in Fall 2008 after two consecutive years of growth. But, it has turned around in Fall 2009 and continued to increase by 17% a year later.
- The newly established Master program of Biomedical Engineering has been successful in attracting a significant number of new students to the program, evidenced by the 222% enrollment surge in Fall 2010 as compared to Fall 2009.
- In comparison with Fall 2009, the enrollment of the College's Doctoral Program shows a 6% increase over the fiveyear period.

OVERALL

- The recent gains at the undergraduate level continue to look very promising for the future enrollment in the College of Engineering.
- The College was recently funded by OBOR under Choose Ohio First Scholarships Program with approximately half million dollars for the program entitled "Engineering across the Pipelines". The program is expected to improve the enrollment at the undergraduate level as well as the Master's level.
- Our 4+1 Accelerated Masters Programs from four departments took effect in Fall 2009.
- The College's recent articulation agreement with Bahceshir University from Turkey resulted in bringing some graduate students since Fall 2009.
- Over a five-year period, the College has realized an overall enrollment gain of 33%.

College of Sciences and Health Professions

GENERAL COMMENTS - ENROLLMENT GROWTH

- The data show substantial enrollment growth in the College over the past five years.
- Steady growth in the number of majors is seen for almost every program in the College over the five year period. Growth is very strong in the School of Health Sciences (including Speech and Hearing), in both number of majors and SCH. Several other programs also show significant growth over the five year period, both at the graduate and undergraduate level, especially in Biology, Environmental Science, and Chemistry.

Present and future growth is supported by the excellent job opportunities in health-related fields. Faster (or much faster) than average growth rates are projected through 2016 by the Bureau of Labor Statistics (www.bls.gov) for physical therapy, occupational therapy, physician assistants (School of Health Sciences), psychologists (Psychology Dept.), medical technologists (Biology Dept.), pharmacists (pre-pharmacy program in Chemistry), physicians (Biology, Chemistry, and Health Sciences), and medical research scientists (graduate programs in Biology, Chemistry, and Physics).

NEW PROGRAMS

- A major source of the increase in Health Science majors is the articulation agreements with Tri-C and Lakeland Community College (with 20 Tri-C health sciences programs feeding students into the undergraduate BSHS program). A greater awareness of excellent employment opportunities in health-related fields and an increasing use of the BSHS major as a pre-professional degree have contributed to this increase as well.
- New programs (e.g., BS in Pharmaceutical Sciences) and new initiatives (e.g., 2+2 agreements with Tri-C and Lakeland) are expected to sustain and accelerate growth for the foreseeable future.
- An agreement to create a CSU psychology major at Lakeland Community College, a MS in Health Sciences Physician Assistant program with Tri-C, and articulation agreements with three universities in the People's Republic of China to accept Chemistry master's students, all will encourage enrollment growth.
- Substantial growth in graduate programs is anticipated with the initiation of several new programs including 4+1 master's degree options in all COSHP units.
- A new joint program with NEOMED will add a post-baccalaureate pre-medicine concentration in Health Sciences with an emphasis on urban health.

DOCTORAL PROGRAMS

- PhD programs in Biology and Chemistry are nationally/internationally visible programs that partner with the Cleveland Clinic. Changes in enrollment are largely a function of available funding to support doctoral programs, but the number of outstanding applicants has continued to increase.
- The PhD program in Psychology, which partners with the University of Akron to focus on Adult Development and Aging, has attracted new doctoral enrollment.

Table 3.7: College of Urban Affairs: Fall Enrollment by Level and Major, 5-Year Trend

Urban Affairs Total

Maxine Goodman Levin College of Urban Affairs

- The Levin College is Ohio's only College of Urban Affairs and is ranked among the top eight schools of urban affairs in the United States. The College is ranked second in U.S. News and World Report's 1998, 2002, 2005, and 2008 editions of America's Best Graduate Schools for the graduate specialty in City Management and Urban Policy.
- The Levin College is "Changing America's Cities One Graduate at a Time". Levin alumni run cities, work for local, state, and federal government, manage community organizations, work in historic preservation, conduct urban research, and contribute to the economic development of urban regions.

Organizational Leadership, is a new collaborative major between the Levin College, the Monte Ahuja College of Business, and the College of Liberal Arts and Social Sciences. Now in its second year, it is the Levin College's second largest undergraduate major, with 65 students enrolled.

Graduate students in the Levin College can apply for graduate assistantships in the College's Urban Center, working with nationally-recognized research professionals on grant-funded projects and learning valuable client-management skills that prepare them for the work-force.

The Urban Studies major continues to grow and remains the largest major in the College.

Nonprofit Administration is now the Levin College's second-largest undergraduate major.

New offerings at the college include the addition of a minor and undergraduate certificate in Sustainable Urban Development, a Certificate in Public Management, and a new articulation agreement between the Environmental Studies major and Cuyahoga Community College's Environmental Health and Safety degrees. These programs are a response to growing student interest in urban sustainability programs in this region and across the nation.

Graduate enrollment in the Environmental Studies program continues to increase, now with over 35 students enrolled.

The PhD in Urban Studies was redesigned and updated in 2010 to include concentrations in Urban Policy and Development, Public Administration, and Communications.

Combined research initiatives for the College will exceed \$3 million in FY 2011.

The Urban Center houses two federally funded applied research programs which include the Great Lakes Environmental Finance Center (EPA) and the Economic Development Administration (EDA) University Center.

The Urban Center was a major intellectual contributor to the region's successful regional sustainability grant application to HUD, from which the Northeast Ohio collaborative received \$4.25 million over three years.

Cleveland-Marshall College of Law

- Graduates of the law school practice in all 50 states, three territories, the District of Columbia and in countries in Europe, Asia, Africa, and Central America.
- Based on LSAT scores and undergraduate GPAs, our law students rank among the top three public law schools in Ohio.
- According to U.S. News & World Report, our part-time program is the best in Ohio.
- According to National Jurist, our law school has one of the top public interest programs in the country.
- More than half of the law school's faculty members have advanced degrees in addition to their law degree.
- The College of Law library has more than a half million volumes in its collection.
- The law school co-sponsors a student summer law institute in St. Petersburg, Russia.
- The Center for Health Law and Policy issues a Certificate in Health Law to JD students who complete a range of courses in Health Law Regulation, Policy & Ethics, or Business & Litigation and complete an externship or clinic in the field of health law, including the new Community Health Advocacy Law Clinic.
- The law school's pipeline programs the Law and Leadership Program and the Summer Legal Academy introduce high school students to the legal profession and provide motivation and mentoring.
- The school was the first-ever recipient of the Diversity Matters award, given by the Law School Admissions Council to the one law school in the country that best demonstrates a commitment to diversity.
- A new state-of-the-art trial courtroom is the most technologically advanced courtroom in any Ohio law school.

Note: The significant jump in 2007 SYAP is related to the formation of the Chinese Academy.

Undergraduate Studies

Undergraduate Studies: All provisional students were admitted into Undergraduate Studies (previously known as University Studies) without specification. Beginning in 2005, there was an initiative to identify a student's interest in specific colleges, and pre-program designations were established. It has been an ongoing process to identify a student's interest, when possible.

East and West Centers

The opening of Cleveland State University West Center (Westlake) in August 2003 and East Center (Solon) in August 2004 established a suburban presence for the University's thriving downtown campus. The mission of the centers is dedicated to serving all students and offering the highest level of customer service. Academic offerings include programs for educators (teachers and administrators), business and public service professionals seeking to complete their university degree, and traditional college-age students and high school students in post-secondary educational option programs. CSU has given high priority to strengthening relationships with local community colleges and supporting the rise of e-Learning. In order to achieve this, East Center in Solon will close as of Aug. 31, 2011.

Partnerships with Lakeland Community College and Lorain County Community College

The partnerships foster direct collaboration with community colleges to offer degree programs on the community college campus in addition to easy transfer through dual admission and various articulation agreements. All locations have grown in popularity as transfer students recognize the value and convenience of gaining an associate's degree and a degree from CSU. Liaison with these community colleges has been well planned and highly successful due to a shared passion for educating students.

BOOK OF TRENDS CLEVELAND STATE UNIVERSITY

Sponsored Programs and Research at Cleveland State University

The University is committed to enhancing the research environment in support of its faculty and students. As such, efforts are underway to expand the research services currently offered to assist those seeking external funding for research, scholarship, and creative projects. Cleveland State University established a new office, the Office of Research, headed by the Vice President for Research and Graduate Studies, who is responsible for raising the research profile at Cleveland State University and for establishing the University as a recognized contributor to the local, regional, national and global research priorities. The creation of this expanding office will enable the University to achieve its mission, in which scholarship and research are held as major tenets.

Bringing discoveries from the laboratory to the classroom and to the world is a long and very expensive undertaking, one that is at the heart of what a university should do and do well. While Cleveland State is a "young" institution, it has committed itself to discovery and to becoming a research-focused university. And, while we are still in the early phases of that steep research incline, CSU has much to show for its initial efforts - efforts that presage a promising future.

It is important to note that the sponsored program proposals and awards that are described by the numbers and charts to follow would not have been possible without the drive, dedication and intellect of the University's talented and diverse faculty and the contributions of graduate students and postdocs.

Table 4.1: Sponsored Program Awards and Expenditures, Fiscal Years 2005-2010

			Fisca	Year			Percent	Change

CCF Expenditures	N/A	N/A	N/A	N/A	N/A	\$24,422,152		
CSU & CCF Total	N/A	N/A	N/A	N/A	N/A	\$42,981,099		

Notes: 5 Year Percent Change is from the period 2005 to 2010.

The Total Award amount for FY 2010 differs from that listed in the Monthly Activity Reports previously published by OSPR (http://www.csuohio.edu/offices/spr/monthlyactivityreports/index.html) for two reasons: 1) the reports in the Book of Trends include State Appropriations as a separate line-item while the Monthly Activity Reports do not. The amount stated here is higher because not all State Appropriation funding has been allocated to a Sponsored Program account. 2) The Award amount in the Monthly Activity Report for FY 2010 and the Award Amount numbers published in the Book of Trends for previous years were based on the Award amount received during that period for each project. For FY 2010, the Total Project Award Amount is reported.

For FY 2010, CSU is including research expenditures from the Lerner Research Institute (LRI) at the Cleveland Clinic Foundation. These expenditures are only for those grants held by LRI faculty who engage with Cleveland State University

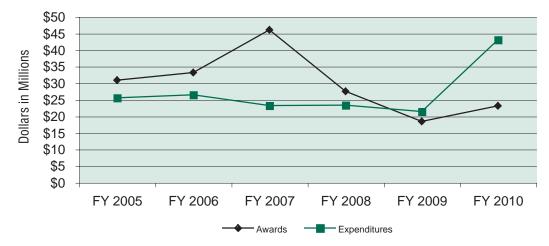

Figure 4.1: Sponsored Program Awards and Expenditures, Fiscal Years 2005-2010

Note: The large increase in funding during Fiscal Year 2007 is due to the \$23.8 million award from the State of Ohio's Third Frontier.

National Science Foundation Rankings of Cleveland State University and Other Selected Schools

The NSF rankings are widely recognized as a valuable benchmark in comparing the level of research taking place at institutions across the country. This survey, completed by over 690 institutions in 2009, compiles research and development expenditures only and is therefore a portion of the sponsored programs expenditures previously reported. The first table (4.5) below compares Cleveland State with other Northern Ohio institutions, while the second (4.5a) shows other institutions ranked similarly to Cleveland State. In addition to seeking and receiving funding for research and development, the University places a heavy emphasis on graduate education and involving those students in the research laboratory.

Table 4.5: National Science Foundation Ranking of Research and Development Expenditures, Fiscal Years 2004-2009 (Northern Ohio Comparison)

	2009			(Dollars in Thous	ands)

Indirect Cost Recovery

Indirect cost recovery is defined as the agreed upon revenue received from a sponsoring agency to pay a grant or contract's share to reimburse the university for the indirect costs it incurs. Indirect costs are real costs. Indirect cost calculations are based upon such items as space, utilities, security, maintenance, custodial, payroll, purchasing, accounting, personnel and many other expenses associated with project administration and implementation. Indirect costs recovered at Cleveland State University (CSU) become part of the general fund budget for the entire University.

Half of all indirect costs returned on sponsored programs remain in the University's general fund. This money is set aside for covering administrative expenses for sponsored program administration. It is also used to cover costs of facilities, depreciation on buildings and equipment, operation and maintenance of facilities, and library expenses. The other half of the indirect costs recovered are distributed as follows: 5% to project director, 15% to project director's department, 10% to relevant dean's office, and 20% to the Vice President for Research & Graduate Studies.

Table 4.6: Indirect Cost (IDC) Recovery and Total Sponsored Program Expenditures by Year, Fiscal Years 2005-2010

							Percent	Change
Research Activities	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	1 Year	5 Year
Direct Sponsored Program Expenditures	\$23,686,707	\$24,308,453	\$21,530,163	\$22,227,857	\$19,544,345	\$17,027,376	-13%	-28%
Indirect Cost Recovered	\$1,969,170	\$2,116,800	\$1,860,080	\$1,626,885	\$1,401,220	\$1,531,571	9%	-22%
Total Sponsored Program Expenditures	\$25,655,877	\$26,425,253	\$23,390,243	\$23,854,742	\$20,945,565	\$18,558,947	-11%	-28%
% IDC of Direct Research Expenditure	s 8%	9%	9%	7%	7%	9%		

Notes: 5 Year Percent Change is from the period 2005 to 2010.

The % IDC is calculated by dividing the actual indirect cost recovered by the actual direct expenditures for each year.

* The success rate for each year is calculated by dividing the Awards Received for that year by the Proposals Submitted during the immediately preceding year. Although it is reasonable to assume that most Awards are based on Proposals submitted during the immediately preceding year, this can create instances where the Success Rate exceeds 100%. This is because some of those years' awards are based on Proposals submitted during both the prior and current year.

Notes: The amounts above do not include State Appropriations. Due to the manner in which the State Appropriation line-item is included in Table 4.2, it is not possible to determine which College or Division received those funds.

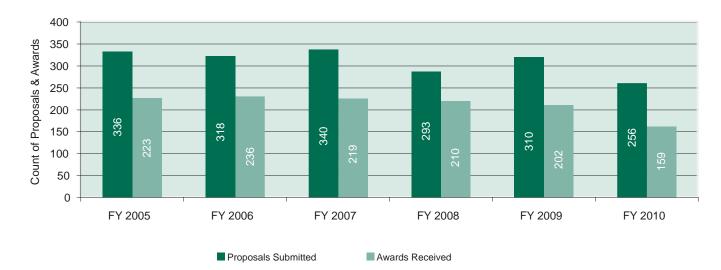

Figure 4.8: Proposal Submissions and Grant Awards, Fiscal Years 2005-2010

Ohio Research Incentive

Research Incentive (formerly Research Challenge) is a performance-based program in that funds are allocated among universities on the basis of their success in generating external research support in the previous fiscal year. Institutional allocations are made annually by the Board of Regents. All institutions are required to submit biennial plans for the expenditure of funds, prior to the allocation of such funds. The plans are reviewed jointly by the Research Officers Council and the Regents' staff. Individual research officers are responsible for the administration of Research Incentive funds allocated to each institution. See *http://regents.ohio.gov/rgp/rsch/research_incentive.php* for more information.

Table 4.9: Ohio Board of Regents Research Challenge Distributions, Fiscal Years 2000-07 and Ohio Research Incentive Distributions, Fiscal Years 2008-11

							Percent	Change
Institution	2000 & 2001	2002 & 2003	2004 & 2005	2006 & 2007	2008 & 2009	2010 & 2011	2 Year	5 Year
Bowling Green State University	\$539,869	\$501,849	\$498,016	\$570,077	\$466,357	\$220,278	-53%	-56%
Central State University	\$151,917	\$200,165	\$192,538	\$136,063	\$152,330	\$112,289	-26%	-44%
Cleveland State University	\$746,199	\$650,417	\$509,906	\$601,125	\$479,541	\$166,732	-65 %	-74%

Highlights

The amount of Research Incentive funds received by the University is based on its level of research expenditures from Federal, Industrial, and Other (as defined in the NSF report) awards as compared to the State University System's total of such expenditures. In order to increase Research Incentive funds, the University must attract additional research funded by these sources. However, it should be noted that even if Cleveland State receives additional funding from these sources, its Research Incentive funding could decrease because other state universities funding increased by a greater amount. To determine our level of Research Incentive funding, the Ohio Board of Regents begins with data taken from the annual National Science Foundation report on Total Research and Development Expenditures.

Intellectual Property

Contemporary universities committed to teaching, research, service, and dissemination of knowledge increasingly find themselves in a position of having created knowledge or materials with commercial value. Creation of such knowledge or materials, also referred to as "intellectual property", is a much coveted outcome of any vibrant research program. Activities that result in the creation of intellectual property improve the reputation of the university and involved researchers. They also create rich educational opportunities for students participating in such programs. Universities may gain significant revenue through commercialized trademarks.

Table 4.10: Intellectual Property: Patents and Disclosures, Fiscal Years 2005-2010

		FISCAL YEAR						Percent Change	
Source	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	1 Year	5 Year

Notes: 5 Year Percent Change is from the period 2005 to 2010.

The following definitions are from the US Patent and Trademark Office (www.uspto.gov)

Disclosure: Description of an invention in a patent or patent application.

Patent: Granting of a property right to the inventor, issued by the United States Patent and Trademark Office.

Licenses approved: The patent law provides for the transfer or sale of a patent, or of an application for a patent, by an instrument in writing. Such an instrument is referred to as an assignment of license.

Growth in Graduate Education

Graduate education at Cleveland State has seen unprecedented growth in recent years, from 3,000 students in the 1980's, to 4,000 in the 1990's, to approximately 5,000 students pursuing graduate and post-graduate programs at the University. Such growth in graduate programs has implications for strengthening the quality of these offerings and seizing opportunities for supporting educational goals of students by creating new and tailored program offerings. Growth in graduate programs at CSU points to numerous research opportunities for future students and faculty researchers. Institutional investments in graduate education are closely linked with strategies for promoting sponsored research, which lead to an increased opportunity for the contributions of graduate, doctoral and post-doctoral students.

Table 4.11: Percentage of Total Student Credit Hours Taken by Graduate Level Students at Selected Ohio 4-Year Institutions-Main Campuses Only, Fall Terms 2006-2010

Indicates institutions that had not finalized enrollment data by query date.

Highlights

Table 4.11 From 2006 to 2010, Cleveland State University has continued to hold steady in the percentage of total student credit hours taken by graduate students. At 20%, Cleveland State University's percentage of total student credits remains among the highest of Ohio's 4-year institutions.

Table 4.12: Cleveland State University Graduate Student Support from Externally Funded Research, Fiscal Years 2006-2010

College	Department	Project Description
Business	Outreach and Business Center	Title VI-B Grant: The Monte Ahuja College of Business is in its third year of a fourth consecutive Title VI-B grant from the U.S. Department of Education to integrate the principles of sustainability across all international business programs, partnerships, and alliances to ensure a high level of quality, sound financial stability and the capacity to prepare a new generation of leaders, educators, and practitioners with the skills and tools necessary to lead competitive businesses in terms of financial success, social value and environmental quality in today's global market place.
		Small Business Development Center (SBDC): The Cleveland State University (CSU) SBDC is funded by the Ohio Department of Development (ODOD) and the Small Business Administration (SBA). The CSU SBDC serves Cuyahoga County. The CSU SBDC provides high quality business and economic development assistance to small businesses and nascent entrepreneurs in order to promote growth, expansion, innovation, increased productivity and management improvement.
		Small Business Jobs Act: The CSU SBDC is the recipient of additional funding made available through the Small Business Jobs Act to extend the Small Business Administration's (SBA) Recovery Loans for small business owners. These funds expand the current small business assistance services offered through the CSU SBDC at Shaker LaunchHouse.
Education and Human Services	Counseling, Administration and Adult Learning	Center for Educational Leadership: Evolved from the nationally recognized First Ring Leadership Academy, the Center offers academic programs to develop and sustain inspired leaders for today's schools. Most notably is the Masters of Education in Organizational Leadership, Ohio's only interdisciplinary Masters Degree leading to Principal Licensure. Also offered are the Education Policy Fellowship Program and the innovative Inspired Leaders Principal Licensure Program.
		Career Passport Program: The first of a three year \$1,000,000 USDE, Institute of Education Sciences grant. Developed, refined, implemented and evaluated a career education program for use in urban high school settings as an intervention to prevent school dropouts. Key personnel, public high school teachers, graduate assistants and consultants designed the curriculum and will pilot test sample lessons for implementation Fall 2011.
		US Department of Education Learn and Serve Program: A \$500,000 one year program designed to select, train and monitor school district sub grantees across Ohio as they developed plans, partnerships and collaborations on promoting communication and interaction among students, school staff, parents, community members and business in order to develop and maintain ownership by all parties in their districts' educational process.
	Curriculum and Foundations	Gifted Education Enters Cyberspace: The graduate program in Gifted Education is offering all six required courses online, extending outreach to meet teachers' needs in serving gifted, talented, and advanced learners in schools across the country.
		Confucius Institute: With the continued support of the Chinese Government, the Institute sponsored K-12 teachers of Chinese, hosted faculty and student exchanges and study abroad programs, provided workshops and materials for teachers, created educational opportunities to learn about Chinese business practices, and staged cultural events.
	Teachers Education	Project Reach: A major 5 year grant to improve Cleveland State University's ability to prepare all teachers to provide effective instruction for Limited English Proficient students, professional development for content area teachers to improve academic achievement of Limited English Proficient students, and to become a region that provides strong support in both language acquisition and content learning for all classrooms that serve Limited English Proficient students.

Table 4.13: Selected Research & Grant Highlights by College

College	Department	Project Description
Education and Human Services	Teacher Education	Highly Qualified Teachers Program: A five year U.S. Department of Education grant to enhance the Special Education Programs. The emphasis is on graduating candidates who meet the highly qualified teacher guidelines under the No Child Left Behind and Individuals with Disabilities Education Act legislation.
		CSUTeach: With the support of the NSF Noyce Scholars Program and Cleveland State's partners (National Math and Science Initiative, UTeach Institute, Ohio STEM Learning Network, and the Cleveland Metropolitan School District) Cleveland State is bringing the UTeach model to Ohio transforming the teacher education experience for pre-service teachers to be licensed to teach grades 7-12, with an emphasis on preparing for underserved, urban classrooms. The Noyce Scholars will be eligible to become licensed STEM teachers.
		Careers in Health and Medical ProfessionS (CHAMPS): An ongoing program developed to recruit minorities into high skill level health care careers by increasing awareness and knowledge. The program provides two or more years of intensive academic enrichment by engaging high school students in skill enhancement, in-depth medical career experiences and thought-provoking science activities while developing them into a unified, cohesive cohort.
Engineering	Chemical & Biomedical Engineering	Medium Design for Optimal Algae Growth and Lipid Productivity: This project investigated the feasibility of dairy-farm digestate as a nutrient source for the growth and oil production of the microalgae Scenedesmus dimorphus.
		Material World Network: Synthesis and Characterization of Functional Molecular Building Blocks for Responsive Materials: This NSF project has aimed at developing environmentally responsive materials that can generate larger responses with shorter response times than current materials.
		Strain-Tolerant Self-Sensing Environmental Barrier Coating for SiC/SiC Ceramic Matrix Composites and Si_3N_4 : This NASA project aimed at developing non-line-of-sight solution-based environmental barrier coating processes and incorporating built-in microstructural textures to eliminate the room temperature strength debit.
		Optical Instrumentation, Non-Destructive Evaluation (NDE), High Temperature Materials and Structures and Numerical Modeling for Advanced Aerospace Application: This NASA project has been carried out via four sub-tasks: propulsion health monitoring system development and instrumentation; integration of NDE and finite element modeling and image visualization; development of acoustics, tomography, and radiography sciences and facilities in operations; and planar optical diagnostics for flow field measurements and optical build up.
		Effect of Convection on Dendritic Array Morphology During Directional Solidification: This NASA project has involved experiments on the International Space Station to understand the role that convection plays in determining the dendritic array morphology and homogeneity.
	Civil and Environmental Engineering	Feasibility of Expanding Use of Steel Slag as a Concrete Pavement Aggregate: The objective of this FHWA/USDOT project has been to provide guidance to state highway agencies, steel slag producers and suppliers, and paving contractors concerning the potential use of steel slag as an aggregate in concrete for paving applications.
		An Integrated Framework for Creation and Assessment of Sustainable Construction Processes: This NSF project aimed toward reducing the carbon footprint of construction. The research has involved developing metrics, strategies, and case studies for sustainable development.
		Implementation and Assessment of Failure Case Studies in the Engineering Curriculum: This NSF project has aimed at developing a series of failure case study workshops for faculty at many locations in the United States and abroad.

College	Department	Project Description
Engineering	Civil and Environmental Engineering	University Transportation Center for Work Zone Safety and Efficiency: The goal of this USDOT project has been to better understand driving behaviors and motivations, and establish work zone traffic control best practices and design protocols to save lives.
		Modeling Stress-Strain Relationships and Predicting Failure Probabilities for Graphite Core Components: The aim of this USDOE project has been to study the implementation of an inelastic constitutive model which would yield the requisite stress-strain information necessary for graphite component design using stochastic failure models
		Pollution Prevention and Sustainable Systems Development: The objectives of this project included the investigation of a wide range of sustainability alternatives and potential pollution prevention activities for NASA-GRC.
		Evaluation of Geotextile Fabric in Undercut of MSE Wall Stability: The aim of this ODOT project was to investigate if the geotextile fabric placed at the undercuts during the construction of mechanically-stabilized-earth retaining walls affects the stability of the retaining walls.
		Prediction of Pile Set-Up in Ohio Soils: This ODOT project was conducted to characterize pile set-up in Ohio soils. An empirical equation was proposed to predict the pile set-up.
		Study of Bankfull Culvert Design Effectiveness: This ODOT study aimed to determine if Ohio bankfull culverts provide the benefit of allowing movement of aquatic biota better than traditional culverts. The results showed that sediments are being washed through culverts with a slope 1% or greater.
		Risk-Based Approach for Examining VSD in On-Site Wastewater Disposal Systems: In on-site wastewater treatment systems, of interest is the minimum vertical separation distance (VSD) between the trench bottom of the subsurface soil absorption system and any restricting layer. In this ODOT project, a stochastic model was developed to estimate the probability that a contaminant concentration will reach a certain point below the trench bottom of the subsurface soil absorption system.
	Electrical and Computer Engineering	Use of VHDL and FPGA in CAI of EVA Systems: This NASA-GRC project focused on VHDL (VHSIC hardware description language) and FPGA (field programmable gate array) systems and their potential uses and issues.
		Development of Active Disturbance Rejection Based RF Control for Superconducting Cavities: This project has been jointly conducted by the Center for Advanced Control Technologies (CACT) at Fenn College of Engineering and the National Superconducting Cyclotron Lab (NSCL) aiming at solving problems in superconducting cavities caused by ground vibrations.
		CSU Technology Brings 57% Energy Saving Across Ten Production Lines in Ravenna, Ohio: The active disturbance rejection control (ADRC) technology developed at CACT has been successfully deployed across ten extrusion lines at the Parker Hannifin facility in Ravenna, Ohio, and a third party verified energy saving of 57%.
		Biogeography-Based Optimization: This NSF project has aimed at developing new nature-inspired methods for the optimization of engineering systems with applications to power distribution, robot control, and cardiac disease diagnosis.
		Rapid Rehabilitation and Return to Function for Amputee Soldiers: This ODOD project has investigated a new design for a hydraulic prosthetic knee for transfemoral amputees, and also aimed to derive control signals for the prosthesis.

College	Department	Project Description
Engineering	Electrical and Computer Engineering	System Response Characteristics of Carbon Nanotube Compounds: This project focused on the characterization of the conductivity and frequency response of various carbon nanotube compounds, by applying electromagnetic sinusoids of different frequencies and amplitudes with a signal generator.
		Improving the Productivity of the Sensor Network Programmer: This NSF project has investigated ways to make construction and maintenance of sensor network systems accessible to "non-programmer specialists", outside the field of computing, who are the real end users of sensor networks.
		Towards Verifiable Programs for Reactive Systems: Software for reactive systems such as wireless sensor networks need to function correctly in the face of hostility. This NSF project has explored artifacts and primitives leading up to verifiable programs.
		Stabilization of Immobilized Enzymes for Implantable Glucose Monitoring Devices: An obstacle for the development of implantable glucose biosensors is the instability of the enzyme immobilized on the electrodes of the sensors as the sensing element. This project funded by the American Diabetes Association has aimed to overcome this problem using a spatial confinement approach.
		NEDG: Exploring Data Access in Internet-Based Wireless Mobile Networks: This NSF project studied cache management, cache invalidation, and cache consistency in the context of Internet-based vehicular ad hoc networks (IVANET).
		Power Electronics for Advanced Lighting Solutions: This project investigated methods to estimate the average value of the load side current by sensing the primary side current of a flyback converter. An analytical model has been developed to determine the response time and steady state error of the estimator.
	Engineering Technology	Wind Spires as an Alternative Energy Source: The wind tower system is aligned with the small distributed wind energy systems initiative of the USDOE aimed for conversion of wind energy into electricity at geographic sites where the wind speed is relatively low. A functional prototype of the system has been installed at CSU campus and operates as predicted.
	Mechanical Engineering	Non-Destructive Evaluation and Structural Health Monitoring of Advanced Composite Materials and Propulsion Systems: The goal of this NASA project is the development and application of nondestructive evaluation techniques for advanced aerospace materials and components. The techniques should distinguish and quantify the types and extent of material manufacturing defects and mission exposure damage.
		Smart Health Monitoring of Rotating Components Using Active Magnetic Force Actuators: This NASA project has aimed at developing and experimentally demonstrating the feasibility of a new approach to smart health monitoring based on nonlinear vibration diagnosis using spectral non-synchronous excitation force.
		Flow Control Under Low-Pressure Turbine Conditions Using Pulsed Jets: This NASA project has been performed through collaboration with the US Naval Academy to study flow through low pressure turbines. 3D airfoil computational models were created and numerical simulations using turbulent models were conducted.
		Advanced Commercial Stirling Cooler Development for Integration into Diverse Market Applications: This project aimed at modeling the thermal performance and suggesting potential areas of improvement of a specific Stirling-cycle cooler, using computational fluid dynamics studies. Flow and heat transfer characteristics were investigated.

College	Department	Project Description
Liberal Arts and Social Sciences	Art	Two faculty have received financial support to continue their artistic work—an "Individual Excellence Award" for photography from the Ohio Arts Council and a "Creative Work Force Fellowship" for painting from the Cuyahoga Arts and Culture program.
	Economics	A faculty member received a three year grant from the National Science Foundation through the Ohio State University to study "The Economic Spillovers of Science."
	History	A panel of seven judges for the state's eTech Ohio Commission has awarded the Center for Public History and Digital Humanities the top prize in the Ohio Mobile Apps Development contest. The Center's award-winning mobile application, Cleveland Historical, is the most recent of several technical innovations that have been by-products of a series of ongoing teacher education grants from the U.S. Department of Education. The app locates people, places, and events in Cleveland history, providing historical tours of the city with the aid of an interactive GPS-enabled map.
	Philosophy	A faculty member received an award from the National Endowment for the Humanities from its "Enduring Questions" program in order to study and develop a course on "What Would an Ideal Society Look Like?"
	Political Science	A faculty member in conjunction with colleagues from Case Western Reserve University and Oberlin College received a grant from the Social Science Research Council for a lecture series on "Scholarship in the Contemporary Muslim World."
	Sociology and Criminology	Faculty in the Criminology Research Center continue their two funded studies of case-processing of domestic violence and discretionary decision-making of police. This year they have also undertaken editorship of the prestigious criminology journal, <i>Homicide Studies</i> .
School of Nursing	Nursing	Choose Ohio First Nursing Scholarship Initiative: In partnership with Case Western Reserve University, University Hospitals and Cleveland Clinic, the School of Nursing addresses the nursing shortage by providing scholarship support and mentorship for a select group of Fellows enrolled in master level programs for those students with the potential and commitment to go on to doctoral study.
Sciences and Health Professions	Biological, Geological and Environmental Sciences	Molecular Cardiovascular Innovation Research: Funding from the Ohio Board of Regents for the Ohio Research Scholars Center of Research Excellence in Molecular Cardiovascular Innovation.
		Characterization of Trypanosome Telomere Complex : This National Institute of Allergy and Infectious Diseases funded study is to explore the function of telomeres, the substances at the ends of each chromosome.
		Novel Approach to Create Chimeric Proteins for Therapeutic Applications: This American Heart Association study focuses on understanding protein folding in genetic expression.
		Translational Silencing in Monocytes: This National Institutes of Health/National Heart, Lung, and Blood Institute (R01) funded study focuses on the Role of L13a.
		Small Nuclear (sn) RNAs: Funding from the Department of Defense to study splicing interference (SPLICE) by small nuclear (SN) RNAs in breast cancer.
		Functional Analysis of the Synaptonemal Complex: A study of the synaptonemal complex funded by the NIH.
		Lake Erie Bioavailable Phosphorus Studies: Funding by the EPA through Heidelberg College, this study provides information concerning Lake Erie from the phosphorus saturation index.
		Extra-Ribosomal Function of Ribosomal Protein L13a in Translational Silencing and Monocyte Mediated Oxidation of LDL: Exploring the role of L13a in inflammation associated with heart disease.

College	Department	Project Description
Sciences and Health Professions	Biological, Geological and Environmental Sciences	NEOECO , funded currently by an Urban-Long Term Research Areas Exploratory Grant (ULTRA-ex) CSU-led partnership of environmental scientists, social scientists, natural resource managers, urban planners, landscape designers, and policy-makers representing multiple institutions and agencies that has organized to provide state-of-the-art scientific and technical support for: (1) Protection of the region's natural capital and the valuable ecosystem services these assets provide; and (2) Revitalization of economically-stressed and environmentally-degraded urban communities.
	Chemistry	Modulating Base Excision Repair in Tumor Drug Resistance: An NIH (National Cancer Institute) through Case Western Reserve University funded study of tumor drug resistance.
		Ohio Consortium for Undergraduate Research: Funding by the National Science Foundation through Ohio State University Research Foundation, this program provides Research Experiences to Enhance Learning (REEL).
		Biophysical and Computational Chemistry Core: In collaboration with the Cleveland Clinic, funded by the National Institutes of Health.
		Recombinant and Chemo-Bio-Orthogonal Synthesis of Liposomal Thrombomodulin: Supported by the National Institutes of Health.
	Mathematics	CBMS Regional Conference in Mathematics: NSF funding to provide a conference on Aspects of Applied Topology.
		Ohio Math and Science Alliance: Funding by the NSF through Ohio State University Research Foundation.
	Psychology	Strength-Based Approaches to Care for Alzheimer's Disease Patients and Families: NIA and Alzheimer's Association funded.
		Understanding PTSD in Pregnant Women: An exploration of the impact of stress on mothers and newborns.
	Physics	Flow Effects on Primary Cilium Deflection: NIH funded project to better understand kidney function.
Urban Affairs	Urban Research & Public Policy	Center for Nonprofit Policy & Practice: Boys and Girls Clubs of Greater Cleveland: Impact study to determine if Boys and Girls Clubs of Greater Cleveland (BGCC) lead to the outcome in which young people who are members of BGCC reach their full potential as productive, caring, and responsible citizens.
		Best Local Land Use Practices: Sponsored by the Ohio Lake Erie Commission and the Ohio Water Resources Council, the Community Planning Program provides this local government outreach component of the statewide Ohio Balanced Growth Program, leading education, technical assistance, and research efforts to support adoption of improved zoning and planning practices to address the dual goals of environmental quality and economic development.
		Regional Sustainable Communities Consortium: Levin College staff were instrumental in preparation of a successful grant to the HUD Sustainable Communities program, on behalf of the Northeast Ohio Sustainable Communities Consortium. Staff and faculty are now active participants in the \$4 million-plus project, which involves collaborative development of a long term policy plan for sustainable environmental, land use and economic development planning across the twelve-county region.
		Putting Artists on the Map: Community Partnership for Arts and Culture (CPAC) contracted the services of the Northern Ohio Data and Information Service (NODIS) to increase understanding of the location decisions of artists. This data can help communities understand why they have a particular set of arts and culture assets and what they can do to make their community more artist-friendly. The research mapped artists and developed artist neighborhood profiles, conducted an artist survey, used predictive modeling, and analyzed artist residential housing stock.

College	Department	Project Description
Urban Affairs	Department of Urban Studies	Racial Disparities in Justice System: Drs. Ronnie Dunn and Bill Bowen of the Levin College of Urban Affairs are collaborating with Drs. Wendy Regoeczi and Stephanie Kent of the CSU Criminology Research Center and Sociology Department in studying the use of police discretion within a sample of selected jurisdictions within Cuyahoga County. This research which is funded by the Cuyahoga County Prosecutor's Office is designed to examine racial disparities within the county's criminal justice system.
		The Greater Cleveland Regional Transit Authority (GCRTA)-Public Management Academy: A \$287,000 grant funded by the Federal Transit Authority via the GCRTA, this program creates and implements a customized management development program for GCRTA managers. The program consists of a series of workshops and group projects that work in concert with the GCRTA – "TransitStat" performance management system.
		Lead EFS: A \$153,100 contract funded by the Cuyahoga County Department of Employment and Family Services. The program is a partnership between Cleveland State University and Case Western Reserve University. The goal of the program is to create a customized management development program for newly promoted Neighborhood Service Center management staff. The curriculum is designed to enhance management skill sets and improve the culture to create a "learning organization" environment within the department.
		The Public Management Academy: A \$45,000 contract funded by several municipal and county government agencies, this program creates a regional management development program that equips public managers with tools that foster collaboration, innovation and efficiency in government services. The long term goal is to create a regional approach with cohort locations strategically placed throughout Northeast Ohio.
		Excellence in Partnerships for Community Outreach and Research in Disparities in Health and Training (EXPORT) Research—Education and Training Core: This project is funded through a 5-year grant from the National Institutes of Health that was awarded to the Case Center for Reducing Health Disparities. The Center for Health Equity at Cleveland State University is responsible for the component of activities designed to increase the number of health professionals, particularly those from minority backgrounds, as part of a larger effort designed to understand and reduce HD in Cleveland. Specific dimensions of the project include expanded recruitment, education, and retention programs. The project worked with students and faculty at primarily CSU and involved students from Cuyahoga Community College (CCC) and Case Western Reserve University (CWRU). The role of the Levin College faculty is to perform formative and summative evaluation functions.

Graduated: represents the cumulative number of distinct cohort students receiving a CSU Doctoral award between the student's first term and the term prior to a given year. Note: Cohort Definition

1) A student attending CSU for the first time, full time at the graduate level, includes students enrolled in the fall term who attended in the prior summer term and

were not admitted prior to CSU as a Non-Degree Graduate Student.

2) By the university census date, the student has registered for 8 or more credit hours in the fall semester.

3) The student is seeking a doctoral degree.

Note: DPT Students are admitted in the Spring term; thus, they are excluded from group of doctoral students starting in the Fall term.

Selected Strategic Indicators – Academic & Administrative Programs

BOOK OF TRENDS CLEVELAND STATE UNIVERSITY

Honors Program

Cleveland State University inaugurated its new Honors Program in Fall 2004 with a class of 40 highly motivated, academically talented first-year students. As of Fall 2011, the enrollment in this program has grown to approximately 200 students.

All new students admitted to the program as freshman receive scholarships covering their tuition, academic fees and books. Honors students accept the challenge of participating in intensive and specialized versions of general education classes, and are granted special consideration in several areas including preference in registration and extended university library borrowing privileges. During summer 2010 and 2011, many Honors students were engaged in paid on-campus undergraduate research experiences.

Honors students enroll in at least four Honors core courses during their freshman and sophomore years at CSU. These courses offer greater breadth or depth than standard university general education classes. Enrollment is limited to Honors students and class sizes are small.

As juniors and seniors, Honors students focus on their majors. Upper division Honors students have the opportunity to do additional Honors work under faculty supervision in established courses, enroll in graduate courses, participate in a faculty member's research project or laboratory, do an independent research project, a service-learning project, and/or an internship, job, or engage in a co-op experience. The specific program depends on the student's major.

Beginning Fall 2005, transfer students and current CSU students entering their junior year have been admitted.

First year students admitted in Fall 2004 were chosen from among applicants who were in the top 10% of their high school class or had a composite ACT score of at least 27 (90th percentile). New first year admits for Fall 2007 and later must be in the top 10% of their high school class or score at least a 30 on the ACT (97th percentile).

Major Features of the Honors Program

Enriched curriculum Leadership development Honors community and experiences

SAT Composite ³	1,267	1,235	1,802	1,953	1,815	-7%	-

Notes: Honors student data reported in this table is provided by the Honors Program Office.

Cohort Year includes newly admitted students in both fall and spring, lower and upper levels.

High School ranking, GPA, ACT and SAT scores reported are for "active" and "lower level" students only.

¹ Total is not the sum of the students due to "dual" majors.

² For cohort year 2008, although the top 10% HS ranking is indicated as 55% there were 10 students who came from schools that do not rank their students.

³ SAT Composite score are the sum of "Math & Verbal" for years 2005 to 2007, for subsequent years, all three components (Math, Verbal, & Writing) are included.

Table 6.3: IPEDS Cohort Characteristics

According to the U.S. Department of Education, and the Integrated Postsecondary Education Data System (IPEDS), the Freshmen Cohort Definition must meet the following criteria: 1) A student attending any institution of higher learning for the first time at the undergraduate level, includes students enrolled in the fall term who attended college for the first time in the prior summer term, also includes students who entered CSU with advanced standing (college credits earned before graduation from high school); 2) By the university census date, the student has registered for 12 or more credit hours in the fall semester; 3) The student is seeking a baccalaureate degree.

Notes:

Days: Monday – Friday 7 a.m. to 4 p.m.

Evenings: Monday - Thursday 4 p.m. to 12 a.m.

Weekends: Classes start after Friday 4 p.m., Saturday and Sunday.

*Unknown includes sections with no class time.

Source: All figures are taken from census files.

Center for eLearning

In 2006 the Center for eLearning was established to lead the University's eLearning initiative. The Center has the goals of increasing University enrollments and enhancing academic quality through fully online degree and certificate programs available.

The Center's major roles are to:

- Provide leadership for the University's eLearning initiative
- Support and train faculty in designing and developing fully online, blended, and Web-enhanced courses
- Work with academic units on eLearning program development and marketing
- Lead in the use of emerging eLearning technologies
- Ensure availability of information and services for online students

Since its establishment, the Center has worked energetically to create a solid support infrastructure for eLearning and to expand the number of programs and courses offered in online or blended formats. As the charts below show, substantial growth in eLearning enrollments has occurred as more online and blended courses are being offered. Enrollments in eLearning courses have continued to grow rapidly, new programs have joined the group of programs already offered online, and support for both faculty and students is strong.

*In Spring 2008, the process was changed to use the Class Attribute Table for those classes listed as ONLINE and/or BLENDED.

** In 2008-09 and going forward, the process will use the Class Attribute Table for extracting Enrollment and SCH information for Annual Web Enrollment and SCH Trends.

Note: Enrollment and SCH is based on those students who did not have a withdraw from a Web Based Course

Enrollment within each semester is unduplicated, but total may be duplicated if a student was enrolled in multiple terms over the year.

** Web-based: Courses delivered primarily using the Internet. These courses are identified by section number (501-509) for Fall 2004-2007,

or by their class attribute (Online and/or Blended) for Fall 2008 and going forward.

Trends in Interactive Video and Telecourse Instructional Delivery

The rapid growth in distance delivered student credit hours illustrates the important role distance learning plays today at many institutions, including Cleveland State. New technology, equipment, growing faculty interest, and support services at CSU have led to an increase in courses offered, the number of students enrolled, and smoother instructional delivery. Faculty development workshops and individual training and support in conducting interactive video classes along with creating web-based classes have been instrumental in developing these courses. Interactive video hook-ups now link our extended campuses and partner schools with the Main Campus, providing students the opportunity to take a class at another site which might not have been possible in the past. Web-based courses provide even more scheduling flexibility.

Learning Communities

Learning Communities have proven to be an effective model for education that addresses both the intellectual and social needs of students. They help students to make a smooth transition from high school to the rigors of university life. CSU launched a new Learning Communities initiative in 2007 with the award of a five-year Title III Strengthening Institutions Grant. This funding provided necessary resources to develop and pilot 50 new Learning Communities that included courses from five of the University's undergraduate colleges. CSU Learning Communities last one semester and involve 3-4 courses organized around an interdisciplinary theme, creating opportunities to make cognitive connections across disciplines. Classes are small and scheduled in blocks. Cohorts of 25 students co-enroll in the Learning Community which helps them get connected and involved with campus activities as they pursue academic interests and goals. It is an innovative educational structure that promotes information literacy with the assignment of an Embedded Librarian. Academic Advising, Peer Mentor Coaches and a variety of other University resources are also systematically involved to support student retention and success.

To date, over 700 students have had the benefit of a Learning Community experience. Participation is voluntary and enrollment typically reflects the rich ethnic and gender diversity that exists in the larger CSU campus community. Since 2007, 84 of these students were invited to participate in the Alpha Lamda Delta Freshman Honor Society based upon outstanding academic performance. Students report that participating in a Learning Community has helped them to learn and utilize important skills including goal-setting, time-management, and improved study habits. They also report an increase in their capacity to make connections between classes and deeper understanding of the material.

Faculty engagement is high with the involvement of over 125 faculty instructors representing five of the University's undergraduate colleges. This includes eight Faculty Fulbright Scholars. Each one has provided quality instruction, utilizing enhanced pedagogical strategies incorporated in the interdisciplinary design of the Learning Community's model. Faculty who teach in the Learning Communities receive training in interdisciplinary teaching and curriculum integration. Many enhanced pedagogically distinctive strategies are used including service-learning, discovery-based learning, instructional-technology, undergraduate research, and a variety of co-curricular activities to foster learning and persistence to graduation.

*With the start of Fall 2007, the definition of students counted in applied, admitted and enrolled categories represents a departure from the past and has been expanded to include multiple applications and admitt records for each student. The new counting process provides a more complete picture of students' interest in CSU programs and an accurate representation of all the programs to which a student is admitted as seen in tables 8.1 to 8.6. The above tables should be used to gauge headcount for the unduplicated applied, admitted, and enrolled at the University Level.

*With the start of Fall 2007, the definition of students counted in applied, admitted and enrolled categories represents a departure from the past and has been expanded to include multiple applications and admit records for each student. The new counting process provides a more complete picture of students' interest in CSU programs and an accurate representation of all the programs to which a student is admitted. The new definition should not be used to gauge headcount alone as a small proportion of students have multiple records.

The enrolled numbers reflect only those students who applied for fall term only; therefore direct comparisons to the IPEDS Cohort may appear misleading as IPEDS includes both those who apply in fall term as well as those who start during the preceeding summer.

To gauge headcount, go to tables 8.0a-d for the unduplicated applied, admitted, and enrolled at the University Level.

Source: Institutional Research Notes: Yield is calculated as the percent of those enrolled from the total admitted. *With the start of Fall 2007, the definition of students counted in applied, admitted and enrolled categories represents a departure from the past and has been expanded to include multiple applications and admit records for each student. The new counting process provides a more complete picture of students' interest in CSU programs and an accurate representation of all the programs to which a student is admitted. The new definition should not be used to gauge headcount alone as a small proportion of students have multiple records. To gauge headcount, go to tables 8.0a-d for the unduplicated applied, admitted, and enrolled at the University Level. **New races were added this year.

Notes: Yield is calculated as the percent of those enrolled from the total admitted.

*With the start of Fall 2007, the definition of students counted in applied, admitted and enrolled categories represents a departure from the past and has been expanded to include multiple applications and admit records for each student. The new counting process provides a more complete picture of students' interest in CSU programs and an accurate representation of all the programs to which a student is admitted as seen in tables 8.1 to 8.6. The above tables should be used to gauge headcount for the unduplicated applied, admitted, and enrolled at the University Level.

The new counting process provides a more complete picture of students' interest in CSU programs and an accurate representation of all the programs to which a student is admitted. The new definition should not be used to gauge headcount alone as a small proportion of students have multiple records. To gauge headcount, go to tables 8.0a-d for the unduplicated applied, admitted, and enrolled at the University Level. **New races were added this year.

Office of Advancement

CSU Foundation

Alumni, faculty, staff, friends, corporations and foundations support Cleveland State University each year with philanthropic gifts. These gifts provide additional resources that are necessary for sustaining a high quality educational experience for the University's diverse student body. Various appeals and initiatives are conducted through the Annual Giving Program, including direct mailings to all alumni, student phonathon drives, specialized mailings from various departments within the University, an annual appeal among the faculty and staff of Cleveland State University, and collaboration with multiple special events held both on and off campus.

Philanthropic Highlights: 2010-2011

- Alumnus Monte Ahuja, MBA '75, made the largest gift in the University's 47-year history -- a \$10 million commitment to fund scholarships in business and engineering as well as an endowed professorship, the Monte Ahuja Endowed Chair in Global Business. Mr. Ahuja used a business plan he developed in a CSU class to found Transtar Industries, Inc., which launched his successful career. The Monte Ahuja College of Business is now named in his honor.
- The Power of Three collaboration between Cleveland State University, the Cleveland Play House and PlayhouseSquare raised \$25 million for the conversion of the historic Allen Theatre into a new performance home for both the Play House and CSU's Department of Theatre and Dance. The reconfigured venue is at the heart of CSU's new arts campus.

Other highlights include:

- Cleveland State University secured more than \$8.5 million for scholarships.
- \$500,000 from Ronald R. Ledin for the President's Discretionary Fund. In addition, Mr. Ledin donated \$100,000 to the Fenn Academy Engineering Education Endowment Fund.
- \$500,000 from an anonymous donor for the President's Discretionary Fund.

- \$433,333 from the Parker Hannifin Foundation for engineering scholarships.
- \$300,000 from Richard L. Bowen & Associates, Inc. for engineering scholarships.
- \$250,000 from the Parker Hannifin Foundation to support cancer research by Dr. Michael Kalafatis, professor of chemistry.
- \$250,000 from the Cleveland Foundation to plan the Partnership for Enhancing Urban Health. This collaboration between Cleveland State University and the Northeast Ohio Medical University (NEOMED) seeks to educate primary care physicians to provide health care in urban areas.
- \$127,000 from the estate of David L. Balint for the David L. Balint Endowed Scholarship Fund.
- \$100,000 from James D. Heckelman for the James D. and Margaret F. Heckelman Scholarship Endowment.
- \$100,000 from the Saint Luke's Foundation for the Partnership for Enhancing Urban Health. This collaboration between Cleveland State University and the Northeast Ohio Medical University (NEOMED) seeks to educate primary care physicians to provide health care in urban areas.

Highlights

Viking athletic teams again celebrated great success as two teams won league championships in 2010-11 – men's tennis and men's golf. In addition to these successes, the following achievements were also realized in 2010-11:

• The men's soccer team defeated No. 1 ranked and Div. 1 National Champion, Akron.

• Women's basketball played in the postseason for the 3rd time in the last 4 years and won their 1st postseason contest. Men's basketball, led by All-American Norris Cole, advanced to postseason play for the 3rd time in the last four years. Cole averaged 20 points, 5 rebounds and 5 assists per game.

- Women's cross country was recognized by the NCAA for an Academic Progress Rate score in the top 10% nationally and 12th highest cross country GPA nationally.
- The women's swimming/diving team set a program record with 15 dual meet wins, while the men's squad was undefeated in Horizon League dual meets.
- The women's tennis team advanced to the Horizon League title match for the 1st time in school history.
- John Marshall won 7 matches at the 2011 Fencing National Championship and placed 21st in epee.

Financial Aid Office

Cleveland State University's Financial Aid Programs

Financial aid is money that is provided to help bridge the gap between students' own resources and the amount of money needed to pay the cost of attending college. Approximately 73 percent of Cleveland State's students receive some form of financial assistance. The University participates in or administers all of the major federal and state grant and loan programs. In addition, Cleveland State provides University grants and scholarships.

Table 8.15: Financial Aid Awards to Undergraduate Students by Full-Time/Part-Time Status, Average Aid Package and Academic Year

				Percent Change			
	2006-07	2007-08	2008-09	2009-10	2010-11	1 year	5 yea

Source: Common Data Set, H2-row D and row J

Financial aid reported reflects awards to undergraduates enrolled in the fall term of the academic year. Although the University awards a substantial amount of financial aid to additional students, this data reflects a particular point in time by using standard figures as defined by IPEDS (http://nces.ed.gov/ipeds/) and the Common Data Set (www.commondataset.org).

Notes

The undergraduate financial aid reported reflects awards to undergraduate students enrolled in the fall semester of the academic year. The university awards financial aid on a continuous basis throughout the academic year. However, this data reflects a specific point and time as defined by IPEDS http:// nces.ed.gov/ipeds/datacenter and the Common Data Set (www.commondataset.org), generally accepted as the 15th day of fall semester.

For financial aid calculations; full-time undergraduate, graduate and law students are those enrolled for 12 or more credit hours. Part-time undergraduate students are enrolled for 11 or fewer credit hours. Part-time graduate and law student enrollment ranges from 6 to 11 credit hours.

The "Cost of Attendance" tables reflect the estimated average cost of attendance for a full-time, in-state student attending CSU for two (2) semesters during the academic year, and includes estimated tuition and fee charges, books, allowances for room and board, transportation and personal/miscellaneous.

Types of Financial Aid

Federal Grants: Pell Grant, Supplemental Opportunity Educational Grant (SEOG), Academic Competitiveness Grant (ACG), National Science and Mathematics Access to Retain Talent Grant (National SMART Grant).

State Grants for Undergraduates: Ohio Instructional Grant, Part-Time Instructional Grant, other State tuition grant programs.

State Aid for Graduate/Law Students: Graduate and Professional Fellowship.

Scholarship/Institutional Grants for Undergraduates: Refer to http://www.csuohio.edu/enrollmentservices/financialaid/scholarships.

Scholarship/Institutional Grants for Graduate/Law Students: Includes Graduate Assistantships, Tuition Waiver and Scholarships.

Non-Institutional Aid: Assistance awarded from external agencies.

Federal Student Loans: Stafford subsidized/unsubsidized and Federal Perkins loans.

FWS: A federally-funded student employment program established to assist students through part-time, on-campus positions or off-campus community service positions.

Center for International Services & Programs

International Services

The Center for International Services & Programs (CISP) seeks to build a globally oriented, metropolitan university where students, faculty and staff gain international knowledge and experience. Established in 1996 as a separate department, CISP provides international students and visitors with a wide array of support services to help them achieve a positive learning experience while in the U.S. A second focus for CISP is supporting Study Abroad opportunities for U.S. students. This is accomplished by supporting Faculty led short term programs, assisting students in identifying study abroad options, administering scholarships and other related education abroad initiatives. Thirdly is to develop and support international academic initiatives within each department and college. The department is key to advising faculty and students on Fulbright opportunities.

A full description of services can be found at: http://www.csuohio.edu/offices/international.

Source: Center for International Services & Programs

College	Academic Initiatives	Activities
Liberal Arts & Social Sciences (CLASS)	Middle Eastern Studies Program	Presently developing a Study Abroad option which will include language and culture studies. Have applied for a Fulbright Scholar in residence grant.
	Masters Program in Global Interactions	Prepares students for a career in a global environment through an interdisciplinary set of courses. International Relations majors will concentrate in an in-depth study of one of the following areas: International Business and Economics, Asia Studies, Central and Post-Soviet States, Africa and the Middle East, or Latin America and the Caribbean.
	Modern Languages	Arabic courses, Chinese courses, English Translations of Foreign Literature (ENF) courses, French (B.A.), German (B.A suspended) minor, Greek courses, Italian courses, Japanese courses, Latin courses, Modern Language (culture; or languages such as Portuguese, Russian, or Quechua) courses, Spanish (B.A.).
	Interdisciplinary Studies	Slovenian Studies Center is created in conjunction with the government of Slovenia, CSU, LCC, KSU, BGSU. Courses will be offered in Slovenian culture and language.
Business	Expand international business education and outreach services in Northeast Ohio	Global Trade Scholar program; Provide market research, international trade and investment assistance; Improve credit transfer between community colleges and CSU for international business degree programs. Recently signed agreements with Friedrich Alexander University, University of Lubjana School of Economics.
Business & CLASS	Faculty Led Short Programs	Study Tour of ChileLanguage and Culture in MexicoStudy Tour of GermanLanguage and Culture in Costa RicaStudy Tour of ParisStudy in SpainStudy Trip to JapanExplore the Auvergne Region and ParisInternational Marketing and Business Research in England
Education & Human Services	Confucius Institute	Providing programming in Chinese Language K-12 Instruction throughout the greater Cleveland area. Special Program to China for Students of Leadership Academy and Cleveland Heights School District.
Engineering	New Academic Program	Developed a 3+1+1 academic program in Electrical engineering, Applied Biomedical Engineering and Software Engineering with Bahcesehir University in Turkey. A group of students have done Engineers without Borders to Belize.
Law	Indian Certification	CSU Law School Degree recognized in India.
Sciences & Health Professions	China Joint Degrees	The Department of Chemistry has developed joint programing with the following Chinese universities: Shenyang Pharmacuetical, Guangxi Teacher Education, Chongqing Three Gorges University.

SCH: Student Credit Hour

Book of Trends 2011

http://www.csuohio.edu/offices/iraa/bot/BoT_11.pdf

The Book of Trends (BOT) 2011 represents the continuing commitment of the Office of Institutional Research and Analysis (IRA) to present updated information about Cleveland State University (CSU). A variety of tables and charts provide trend information over a five-year period as well as some key attributes and characteristics of the University for the most recently completed academic year.

The purpose of this publication is to provide readers with frequently requested statistical information used in planning, reporting, and assessment. In order to serve the campus community more effectively, we welcome suggestions and comments.

- 1. The student information presented in the **Book of Trends 2011** is based on the **End of Semester files** used for Ohio Board of Regents (OBOR) reports unless specifically noted from a different data source.
- 2. Students exclusively enrolled in English as a Second Language, Study Abroad or other zero credit hour courses are included in the Book of Trends for years 2006-10.
- 3. This year's BOT begins to reflect recent changes in the University's organization by breaking the School of Nursing out of the College of Education and Human Services in many (but not all) tables; hence one may notice a shift in prior year's numbers for those units.
- 4. Last year's table 3.12 Dual Major Enrollment by College and Academic Level has been removed and an extra column has been added to Tables 3.1-3.11a to provide the information formerly presented in table 3.12.
- 5. There have been a few changes in section 1: (a) A table has been added to section 1 which details the leadership of the Student Government Association, (b) the Distinguished Alumni Awards table remains the same as last year's because the awards ceremony has been moved to October and the winners haven't been announced yet.
- 6. Last year's table 8.25 Enrollment by Country or Regions has been moved to table 2.19 to more clearly delineate the differing definitions of IR's Non-Resident Alien students and CISP's definition of International students.
- 7. IPEDS Cohort Graduation and Retention tables 5.6a & b are now accompanied by 5.6c & 5.6d which represent New Masters and Doctoral cohorts. New Doctoral and New Masters students are categorized by IRA and Graduate Admissions.
- 8. The Nance College of Business has been renamed the Monte Ahuja College of Business in honor of alumnus Monte Ahuja, MBA '75, who donated \$10 million to the University to support scholarships and an endowed chair.
- 9. The various Deans' offices provided IRA with a set of grant/highlight information used to produce Table 4.13. IRA limited these selections in order to meet space requirements. This table is not intended to be a comprehensive listing, but merely to reflect some of the interesting activities of our faculty, staff and students.
- 10. Each year we attempt to provide comparative data to other colleges and universities in Ohio. These comparisons are typically centered on information available from the Ohio Board of Regents' Higher Education Information System (HEI) http://regents. ohio.gov/hei/index.php. At the time of publication a few of the tables normally presented here were not available due to some schools updating prior years' data, or changes to the HEI system. Please be aware that the HEI tables presented in this year's book represent various states of completion:
- a. The data may be complete for the reporting year and can be used accordingly.
- b. The data may be complete for most institutions, but a few may be unfinalized, in which case only finalized ones are reported or in some cases unfinalized numbers are included but footnoted as such.
- c. In some cases many schools had unfinalized the type of data being reviewed and in those cases we have simply reproduced the prior year's data with appropriate titles and footnotes.
- 11. With the decentralization of Continuing Education that portion of section 3 has been removed from this year's Book.
- 12. The procedure used to identify CSU's IPEDS cohort has been updated to be a more collaborative effort between IRA and the Registrar's Office.
- 13. This year we will report Ethnicity data using the new IPEDS definitions which includes the category 'Two or More Races'.

Please direct questions and/or suggestions to 216-687-4700. The entire Book of Trends series is available online on the IRA website (http://www.csuohio.edu/iraa/bot/bookoftrends.html).

We encourage you to reference the web version of the Book of Trends because we can easily make changes/updates if necessary. By the same token, if a URL is provided in the book such as the ones linked to Research Centers & Institutes, the Ohio Board of Regents, etc., we encourage you to refer to the linked site for the most up-to-date information.

We would like to take this opportunity to thank all members of the campus community as well as our graduate assistants for their support and contributions to this publication.
